Subject Index

Adrenaline, depressed responsiveness to, in platelets from apparently normal human donors: a familial trait (SCRUTTON, CLARE, HUTTON & BRUCKDORFER), 307.
Anaemia, aplastic, bone marrow fibroblastoid colonies in (GORDON & GORDON-SMITH), 135.
Anaemia, aplastic, bone marrow fibroblastoid colony-forming cells (F-CFC) in: colony growth and stimulation of granulocyte-macrophage colony-forming cells (GM-CFC), 465.
Anaemia, autoimmune haemolytic, a negative direct anti-

globulin test with strong IgG red cell autoantibodies present in the serum of a patient with (VAN'T VEER, VAN WIERINGEN, VAN LEEUWEN, OVERBEEKE, VON DEM BORNE & ENGELFRIET), 383.
Anaemia, haemolytic, induced by an antihistaminic agent, the I antigen as an immune complex receptor in a case of (DURAN-SUAREZ, MARTIN-VEGA, ARGELAGUES, MASSUET, RIBERA, VILASECA, ARNAU & TRIGINER), 153.
Anaemia, severe aplastic, ABO incompatible bone marrow transplantation for (PALMER, HOWS & GORDON-SMITH), 139.
Anaemia, severe aplastic, bone marrow transplantation in: a survey of the European Group for Bone Marrow Transplantation (GLUCKMAN, BARRETT, ARCESE, DEVERGIE & DEGOULET), 165.
Anaemia, severe aplastic, effect of cyclosporin A in graft failure following allogeneic bone marrow transplantation for (HOWS, GORDON-SMITH & PALMER), 139.
Anaesthesia, nitrous oxide, the patient under, as an ideal model for vitamin B_{12} inactivation as shown by serial serum methionine valine and uracil measurements (PARRY, BLACKMORE & ROBERTS), 137.

Bleeding and congenital platelet dysfunction (TOBELEM), 144.
Bleeding tendency, familial, with partial platelet thromboxane synthetase deficiency: reorientation of cyclic endoperoxide metabolism (DEFREYN, MACHIN, CARRERAS, VERGARA DAUDEN, CHAMONE & VERMYLEN), 29.
Blood count, effects of smoking and the pill on (DODSWORTH, DEAN & BROOM), 484.
Book reviews:
Advances in Hemoglobin Analysis, 663.
Anticoagulants and Fibrinolytics, 662.
Fourth Cooley's Anemia Symposium, 157.
Fundamentals of Hematology, 156.
Iron, 156.
Iron in Biochemistry and Medicine II, 155.
Radionuclide Tracer Techniques in Haematology, 662.
The Eosinophil in Health and Disease, 157.
The Leukaemic Cell, 316.
Budd-Chiari syndrome in paroxysmal nocturnal haemoglobinuria—revisited (LEIBOWITZ & HARTMANN), 659.

Collagen, platelet adherence to: role of prostaglandin–thromboxane synthesis (COWAN), 425.
Coumarin therapy, abnormal migration of serum antithrombin II in patients on, by cross-immunoelectrophoresis (ANTONIO, GIOVANNI M., CRISTINA & VITTORIO), 490.
Cyclophosphamide, high dose, haematological effects of, and autologous bone marrow transplantation (HARPER, LINCH, GOLDSTONE, RICHARDS & SOUHAMI), 138.
Cyclosporin A, effect in graft failure following allogeneic bone marrow transplantation for severe aplastic anaemia (HOWS, GORDON-SMITH & PALMER), 139.

Dynamics of red cell egress from bone marrow after blood letting (AOKI & TAVASSOLI), 337.

ELISA test in leucocyte and platelet antibody detection (DOUGHTY & JAMES), 142.
Emperipolesis by megakaryocytes in blood loss (TAVASSOLI), 656.
Eosinophils, vacuolated and degranulated, the mechanisms which produce (TAI & SPRY), 219.
Erythrocyte clearance curves, heat-damaged, analysis of (PETERS, RYAN, KLONIZAKIS, ELKON, LEWIS & HUGHES), 581.
Erythrocytes, human, intact, an examination of the labelling of, with ^{99m}Tc (THOMPSON, NEWMAN & MADDY), 575.
Erythroid bursts in *in vitro* culture are megaloblastic: studies on the mechanism (REID, BAPTISTA & CHANARIN), 136.
Erythroid progenitors, surface antigens expressed on (SIEFF, ROBINSON, LAM, GREAVES & HARDISTY), 132.
Erythropoietin, exogeneous, growth of human erythroid and erythroid-granulocytic colonies without addition of exogeneous erythropoietin (NISHIHIRA & KIGASAWA), 563.
Erythropoietin, immunoreactive, diurnal levels of, in normal subjects and subjects with chronic lung disease (MILLER, GARCIA, COHEN, CRONKITE, MOCCIA & ACEVEDO), 189.
Erythropoietin, immunoreactive, in serum of normal subjects (COTES & BROZOVIC), 130.

Factor VII, as assessment of an amidolytic assay for, in the laboratory control of oral anticoagulants (POLLER, THOMSON, BODZENTA, EASTON, LATALLO & CHMIELEWSKA), 69.
Factor VIII coagulant, low-molecular-weight canine, binding of, from von Willebrand plasma to canine factor VIII-related antigen (BENSON, JOHNSON & DODDS), 541.
Factor VIII inhibitors revisited (BLOOM), 319.
Factor VIII/von Willebrand factor, alterations of, in clinical conditions associated with an increase in its plasma concentration (LOMBARDI, MANNUCCI, SEGHATCHIAN, VICENTE GARCIA & COPPOLA), 61.
Factor XI, contact activation of (JACOBS, MANNHALTER, MARGALIT & SCHIFFMAN), 77.
Ferritin concentration in normal and abnormal erythrocytes measured by immunoradiometric assay with antibodies to heart and spleen ferritin and Mössbauer spectroscopy (JACOBS, PETERS, BAUMINGER, EIKELBOOM, OFER & RACHMILEWITZ), 201.
Ferritin polymers and the formation of haemosiderin (HOY & JACOBS), 135, 593.
Ferritin, serum, from siderotic mice contains iron (HONDA & MASSOVER), 653.
Ferritin synthesis in inflammation. II. Mechanism of increased ferritin synthesis (KONIJN, CARMEL, LEVY & HERSHKO), 361.
Folate depletion and methotrexate accumulation in cells as a possible mechanism of chronic toxicity to the drug (KAMEN, NYLEN, CAMITTA & BERTINO), 357.

Gene arrangement, a new triplicated α-globin, in man (TRENT, HIGGS, CLEGG & WEATHERALL), 149.
Glanzmann's thrombasthenia (JENKINS, ALI-BRIGGS & CLEMETSON), 439.
β^E-globin chain does not co-electrophorese with β^A-chain in polyacrylamide gel (CHAICHAROEN & WASI), 483.
Glycoprotein I, human, monoclonal antibody to (MCMICHAEL *et al*, RUAN *et al*), 501, 511.
Granulocytes, cryopreserved, biochemical studies on: poss-

ible explanations for the defects induced (McCarthy, Goldman & Peters), 227.
Haemochromatosis, primary idiopathic, iron uptake and ferritin synthesis by peripheral blood leucocytes in patients with (Jacobs & Summers), 649.
Haemodilution a good thing? (Marshall), 146.
Haemoglobin E, defective synthesis of is due to reduced levels of β^E mRNA (Traeger, Wood, Clegg, Weatherall & Wasi), 134.
Haemoglobin haemolytic crises, unstable: contributions of pyrexia and neutrophil oxidants (Winterbourn, Williamson, Vissers & Carrell), 111.
Haemoglobin H disease and mental retardation—a new syndrome or a remarkable coincidence? (Higgs, Bunch, Old, Hunt, Bethlenfalvay, Sjolin, Koler, Clegg & Weatherall), 129.
Haemoglobin H disease, morphology and kinetics of erythropoiesis in (Wickramasinghe, Hughes, Wasi & Fucharoen), 185.
Haemoglobin levels, fetal, in normal and erythropoietically stressed baboons, genetic relationship between (De-Simone, Heller, Biel & Zwiers), 175.
Haemoglobin synthesis by fetal erythroid cells in an adult environment (Bunch, Wood, Weatherall, Robinson & Corp), 325.
Haemoglobin synthesis in human erythroid bursts during ontogeny: varying ratios of Hb F/Hb A during erythroblast differentiation *in vitro* (Darbre, Lauckner, Wood & Weatherall), 133.
Haemoglobinuria, paroxysmal nocturnal, the Budd-Chiari syndrome in—revisited (Leibowitz & Hartmann), 659.
Haemolytic disease of the newborn, a survey of maternal anti-D levels related to (Tomlinson, James & Wagstaff), 130.
Haemophilia, the role of synovectomy in the management of recurrent haemarthroses in (Kay, Stainsby, Buzzard, Fearns, Hamilton, Owen & Jones), 53.
Haemophiliacs, treatment with antibodies to factor VIII, clinical experience with polyelectrolyte-fractionated porcine factor VIII concentrate in (Kernoff, Thomas, Lilley & Tuddenham), 131.
Haemopoietic cell proliferation, the role of the 'sodium pump' in the control of (Steed, Boardman & Delamore), 130.
Haemosiderin, ferritin polymers and the formation of (Hoy & Jacobs), 135, 593.
Heparin-induced thrombocytopenia: effect of heparin platelet antibody on platelets (Benson, Johnson & Dodds), 541.
Histone variant composition of normal and leukaemic human lymphocytes: analysis by gel electrophoresis of whole cells and nuclei (Froussard, Tempelis & Levy), 275.
Hypoxanthine-guanine phosphoribosyl-transferase activity in normal and leukaemic lymphocytes (Rambotti & Davis), 23.

Iron, release by resident and stimulated mouse peritoneal macrophages following ingestion and degradation of transferrin–antitransferrin immune complexes (Esparza & Brock), 603.

Leukaemia, acute lymphoblastic, abnormal regulation of B lymphocyte differentiation and function in parents of children with (Rapson & Till), 138.
Leukaemia, acute lymphoblastic, long-term abnormalities in T and B lymphocyte function in children following treatment for (Layward, Levinsky & Butler), 251.
Leukaemia, acute myeloid, relapsed, terminal transferase expression in (Bradstock *et al*), 621.
Leukaemia, advanced B-chronic lymphocytic, unusual T-cell phenotype in (Matutes, Wechsler, Gomez, Cherchi & Catovsky), 635.
Leukaemia, B cell chronic lymphocytic, B lymphocyte function in (Wolos & Davey), 395.
Leukaemia cells, acute myeloid, sensitivity to colony stimulating activity: relation to response to chemotherapy (Francis, Tuma, Berney & Hoffbrand), 259.
Leukaemia cells, clone-forming myeloid, the sensitivity of, to colony stimulating activity: relation to response to chemotherapy (Francis, Tuma, Berney, Wing & Hoffbrand), 133.
Leukaemia, childhood, the aplastic presentation of: a feature of common-ALL (Breatnach, Chessells & Greaves), 387.
Leukaemia, chronic granulocytic, the clinical significance of atypical Ph^1 chromosomes in (Watmore, Potter, Cooke, Lilleyman & Sokol), 140.
Leukaemia, chronic lymphocytic, a new parameter in: total tumour mass score (TTM) (Jakšić & Vitale), 405.
Leukaemia, chronic lymphocytic, the migratory properties of Indium-111 oxine labelled lymphocytes in patients with (Wagstaff, Gibson, Thatcher & Crowther), 283.
Leukaemia, chronic lymphocytic, thymidine kinase isoenzymes in (Ellims, Gan & van der Weyden), 479.
Leukaemia, chronic myelocytic: a pluripotent haemopoietic cell is involved in the malignant clone (Douer, Levin, Sparkes, Fabian, Sparkes, Cline & Koeffler), 615.
Leukaemia, human acute, circulating immune complexes in (Balestrieri, Tincani, Cattaneo, Rossi, Verzura, Marini, Calculli, Ferremi & Marinone), 269.
Leukaemia, prolymphocytic, splenic irradiation in (Oscier, Errington, Catovsky, Goolden & Roberts), 140.
Leukaemia, Thy-acute, studies on the biochemical sequelae of therapy in, with the adenosine deaminase inhibitor 2'-deoxycoformycin (Russell, Prentice, Lee, Piga, Ganeshaguru, Smyth & Hoffbrand), 1.
Leukaemias, B-cell, surface markers studies in, with the monoclonal antibody FMC7 (Catovsky, Cherchi, Matutes, Brooks, Bradley & Zola), 137.
Leukaemias, hairy-cell and other B-cell, expression of receptors for IgA in (Lydyard, Powell, Fanger, Worman & Cawley), 643.
Leukaemic and normal human lymphocytes, histone variant composition of: analysis by gel electrophoresis of whole cells and nuclei (Froussard, Tempelis & Levy), 275.
Lymphoblasts of thymic and non-thymic origin, differences in DNA synthesis between (Taheri, Wickremasinghe & Hoffbrand), 132.
Lymphocytes, normal and leukaemic, hypoxanthine-guanine phosphoribosyl-transferase activity in (Rambotti & Davis), 23.
M3 variant in children retrospective evaluation of (Cantù Rajnoldi, Ferrari, Cattoretti, Rossi & Masera), 315.
Malaria parasites, entry into resealed ghosts of human and

simian erythrocytes (Dluzewski, Rangachari, Wilson & Gratzer), 97.
Marrow, human bone, a proliferative defect after transplantation (Barrett & Adams), 159.
Megaloblastic change is a feature of colonies derived from an early erythroid progenitor (BFU-E) stimulated by monocytes in culture (Reid, Baptista, Deacon & Chanarin), 551.
Mepacrine stains the dense bodies of human platelets and not platelet lysosomes (Skaer, Flemans & McQuilkan), 435.
Methotrexate accumulation and folate depletion in cells as a possible mechanism of chronic toxicity to the drug (Kamen, Nylen, Camitta & Pertino), 357.
Monosomy 7 in childhood: a myeloproliferative disorder (Sieff, Chessells, Harvey, Pickthall & Lawler), 235.
Monosomy 7 in childhood: a preleukaemic state (Chessells, Sieff, Harvey, Pickthall & Lawler), 129.
Myelodysplasia, acute, with myelofibrosis: a report of eight cases (Sultan, Sigaux, Imbert & Reyes), 11.
Myelofibrosis, idiopathic: a possible role for immune-complexes in the pathogenesis of bone marrow fibrosis (Caligaris Cappio, Vigliani, Novarino, Camussi, Campana & Gavosto), 17.
Myelofibrosis with acute myelodysplasia: a report of eight cases (Sultan, Sigaux, Imbert & Reyes), 11.
Myeloma, multiple, T-cell subpopulations in: correlation with clinical disease status (Oken & Kay), 629.
Myeloproliferative disease, platelet morphometric analysis in (Cottier, Fisher, Brodie & Bellingham), 140.

Neutropenia associated with excess of T cell lymphocytes (Delforge, Bron & Stryckmans), 488.
Nitrous oxide in man, serial studies on the effects of (Skacel, Chanarin, Lumb, Lewis, Hewlett & Nunn), 137.

Ph[1] chromosomes, atypical, clinical significance in chronic granulocytic leukaemia (Watmore, Potter, Cooke, Lilleyman & Sokol), 140.
Platelet adherence to collagen: role of prostaglandin–thromboxane synthesis (Cowan), 425.
Platelet inhibition by drugs: antithrombotic therapy (Prentice), 144.
Platelet membrane glycoproteins, antibodies against (Jenkins, Ali-Briggs & Clemetson), 439.
Platelet reactivity with vessel wall subendothelium in chronic myeloproliferative disease, functional and morphological studies of (Sacher, Jacobson & McGill), 43.
Platelets and vessel wall, update on the interaction of (Sixma), 143.
Polycythaemia matters, why (Pearson), 146.
Polycythaemia, treated, viscosity and iron deficiency in (Pearson, Grimes, Slater & Wetherley-Mein), 123.
Prostacyclin deficiency in thrombotic thrombocytopenic purpura and the haemolytic uraemic syndrome (Machin, Defreyn, Vermylen & Willoughby), 141.
Prostacyclin in cardiopulmonary bypass surgery, a double blind study of (Walker, Davidson, Faichney, Wheatley & Davidson), 415.
Proteinuria, glomerular, acquired α_2 antiplasmin deficiency in (Taberner), 142.
Prothrombin synthesis and modification, investigation of (Beecroft & Sanderson), 142.
Purine loss from human erythrocytes, dependence on external pH (Schraufstätter & Born), 349.
Purpura, post-transfusion: a serological and immunochemical study (Pegels, Bruynes, Engelfriet & von dem Borne), 521.

Red cell volume and splenic red cell pool, measurement using ^{113m}Indium (Radia, Peters, Deenmamode, Fitzpatrick & Lewis), 587.
Reticuloendothelial iron kinetics in man, the quantitation of (Bentley, Cavill, Roeser & Stefanelli), 135.
Rh immunization, primary, failure to augment using a small dose of 'passive' IgG anti-Rh (Contreras & Mollison), 371.
Ristocetin-induced platelet aggregation, racial differences in (Buchanan, Holtkamp & Levy), 455.

Sickle-cell crisis, erythrocyte deformability in (Kenny, Meakin, Worthington & Stuart), 103, 665.
Spherocytosis, hereditary, serum ferritin in patients with (Blacklock & Meerkin), 117.
Spherocytosis, screening tests for (Zanella & Sirchia), 489.
Splenectomy, blood viscosity factors after (Robertson, Simpson & Losowsky), 143.
Synovectomy, role in the management of recurrent haemarthroses in haemophilia (Kay, Stainsby, Buzzard, Fearns, Hamilton, Owen & Jones), 53.

Thalassaemia caused by a novel rearrangement involving the α-δ-β globin gene cluster (Jones, Old, Trent, Clegg & Weatherall), 134.
Thrombocytopenia, heparin-induced: effect of heparin platelet antibody on platelets (Chong, Grace & Rozenberg), 531.
Thrombocytopenia, relationship of raised platelet IgG in, to total platelet protein content (Pfueller, Cosgrove, Firkin & Tew), 293.
Thrombopoietin, assay and site of production of (McDonald), 493.
Thrombotic disorders, role of platelets in (Preston), 143.
Thymidine kinase isoenzymes in chronic lymphocytic leukaemia (Ellims, Gan & van der Weyden), 479.
Thymidylate synthesis in a folate deprived cell line (Marquet, Zittoun, Weynants & Zittoun), 87.
Transferrin, mouse, specific enhancement of mouse CFU-E by (Rich, Sawatzki & Kubanek), 567.
Transfusion studies in patients with familial antithrombin III (ATIII) deficiency: half-disappearance time of infused ATIII and influence of such infusion on platelet life-span (Winter, Fenech, Bennett & Douglas), 449.

UK-37,248, a new selective inhibitor of thromboxane synthetase, administration to man of (Tyler, Parry, Wood & Saxton), 141.

Viscosity, blood, is reducing of clinical benefit? (Dormandy), 147.
Viscosity, blood, laboratory investigation of the factors that contribute to (Stuart), 145.
Viscosity measurements, whole blood, clinical use of (Lowe), 145.
Von Willebrand/factor VIII, alterations of, in clinical conditions associated with an increase in its plasma concentration (Lombardi, Mannucci, Seghatchian, Vicente Garcia & Coppola), 61.
